Bhopal, Madhya Pradesh

Summary

Aspiring Data Analyst with hands-on experience in Python, SQL, Excel, Power BI, and data visualization. Skilled in data cleaning, exploratory data analysis (EDA), dashboard creation, reporting, and business intelligence. Passionate about transforming raw data into actionable business insights and supporting data-driven decision making.

Skills

Programming: Python, SQL

Libraries: Pandas

Data Visualization & Tools: MS Excel, Power BI, Jupyter Notebook

Database: MySQL Workbench

Data Analysis & Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Trend Analysis, Business Insights, Reporting

Projects

E-Commerce Sales Data Analysis | *Python, Pandas, Matplotlib, Jupyter Notebook*

Jan 2026

- Performed end-to-end data cleaning and preprocessing on e-commerce sales data, including handling missing values and date formatting.
- Conducted **Exploratory Data Analysis (EDA)** to identify sales trends, customer behavior, and product performance.
- Analyzed category-wise, region-wise, and segment-wise sales and profitability to uncover key business insights.
- Created data visualizations using Matplotlib to identify sales trends, customer behavior, and product performance.
- Derived actionable business insights to support data-driven decision-making and improve sales strategy.

Web Scraping & Analysis of Job Market Data | *Python, Pandas, BeautifulSoup, Requests*

Jan 2026

- Scraped real-world job listings data using Python (BeautifulSoup, Requests) to collect job titles, companies, locations, and salaries.
- Performed data cleaning and **Exploratory Data Analysis (EDA)** to uncover hiring trends and salary patterns.
- Analyzed job listings data to identify hiring trends, salary patterns, and in-demand skills.
- Published the complete project on GitHub with structured code and documentation.

Pizza Sales Data Analysis (SQL Project) | *SQL, MySQL Workbench*

Jan 2026

- Performed end-to-end analysis on pizza sales data using SQL to answer key business questions.
- Utilized **INNER JOINS, GROUP BY, subqueries, window functions, and aggregate functions** for data extraction and analysis.
- Analyzed sales performance metrics including total revenue, order volume, top-selling pizzas, and category-wise trends.
- Conducted time-based analysis to identify daily sales trends and cumulative revenue growth.
- Structured and documented SQL queries and analysis results for portfolio and interview presentation.

Education

SAGE University, Bhopal

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 8.75/10

Awards & Certifications

- **Data Analytics Essentials** – Data Analysis, Data Visualization, Business Insights, and Analytical Thinking.
- **Introduction to Data Science** – Data Science Concepts, Data Analysis Workflow, and Data-Driven Decision Making.
- **Python Essentials 1** – Python Programming, Functions, Loops, Data Structures, and Problem Solving.
